## FullStack Developer

### WORK EXPERIENCE (4 YEARS)

#### FULL STACK DEVELOPER AT UNIVERSAE

*From [12-2021] to [03-2023] at [UNIVERSAE], [Murcia], [Spain]*

Full Stack Developer for UNIVERSAE, responsible for the universae.com website since its inception. This website features a custom integration with the CRM connected via the REST API method, a custom-built payment gateway using PHP and connected to Stripe, PayPal, and Paycomet through the REST API method.

My tech stack in this role included: JavaScript, React.js, PHP, MySQL, REST API, and PHP.

For the development of new front-end elements, we also utilized the following technologies: Figma and AdobeXD.

#### FULL STACK DEVELOPER AT DOERSDF

*From [03-2023] to [present] at [Remote], [Madrid], [Spain]*

Full Stack Developer for the DoersDF agency, the lead responsible for over 10 international websites such as Sanmiguel and Oxfam. Due to the diversity of the websites, my tech stack in this role is quite varied. In addition to website development, I have also undertaken custom plugin development, mobile app development for Android and iOS, integrations with CRMs using SOAP API and REST API, and API development.

Regarding project management, I am the point of contact with clients for any new developments or modifications that may arise.

My tech stack in this role includes: JavaScript, React, Vue.js, Astro, NodeJS, PHP, Twig, HTML, CSS, TailwindCSS, SASS, REST API, SOAP API, MongoDB, and MySQL.

For creating new front-end elements, we use the design tool Figma.
